C06 ME model checks

Run 19 Oct 2026 Reference: the AR model of each building 18 ME models in 14 buildings

5 of 18 ME models need a fix. 1 building has no ME model. 3 models have CAD imports or Generic Models to review.

Check	What is checked	Checked	With issue	Status	What the modeller does
Coordinates	Within 30 m of the reference model of its building, on the shared site	18 models	none	FIX	Export the NWC again from Revit on the project shared coordinates
Missing model	Every building that has other models has an ME model	15 buildings	1 building	FIX	Issue the ME model for the building
Naming	Name is 1104-PAR-<building>-ZZZ-ME-MOD-<number>	18 models	none	OK	Nothing to do
File age	NWC saved in the last 7 days	18 models	none	OK	Nothing to do
CAD imports	No DWG, IPT or IAM imported into the model	18 models	none	REVIEW	Replace each import with a Revit family, or delete it
Generic Models	No family left in the Generic Models category	18 models	none	REVIEW	Move each family to its right category, for example Mechanical Equipment

Tabs

Models	one row per ME model, red where a check failed
To fix	one row per thing to fix, High first, with the words to send the modeller
Element IDs	one element per row. Filter on Model, copy the IDs, then Revit Manage > Select by ID

Where a building has no AR model, the EL model is the reference (1B06WL). Where it has no AR or EL, the ME model is (1B06M1, 1B06PK, 1C06M2).

C06 ME models

One row per model. Red: fix before the next clash run. Amber: review. Grey: nothing to do.

Building	Model	Status	Compared with	Off the reference (m)	Naming	File age (days)	CAD imports (files)	Generic Models (elements)	File name

C06 ME to fix

One row per thing to fix. High first. Send the Fix words to the modeller as they are.

No.	Priority	Building	Model	Check	Finding	Value	Unit	Fix
1	High	1B06PH	ME-000002	Coordinates	118.7 m from the AR model. ME on site ARD_PW_CHLOR BUILDING, AR on PWPS_Shared_Location	118.7	m	Export the NWC again on the project shared coordinates
2	High	1B06PP	ME-000002	Coordinates	255.2 m from the AR model. ME on site 16-S01, AR on IRPS-SharedCoordinate	255.2	m	Export the NWC again on the project shared coordinates
3	High	1B06PP	ME-000003	Coordinates	328.3 m from the AR model. ME on site 16-S01, AR on IRPS-SharedCoordinate	328.3	m	Export the NWC again on the project shared coordinates
4	High	1B06PS	none	Missing model	No ME model. AR, EL and ST are issued			Issue the ME model for this building
5	High	1B06WL	ME-000001	Coordinates	30.2 m from the EL model. ME on site PW3_Shared_Location, EL on IGN2	30.2	m	Export the NWC again on the project shared coordinates
6	High	1B06WL	ME-000002	Coordinates	30.2 m from the EL model. ME on site SWLS-02 MECH, EL on IGN2	30.2	m	Export the NWC again on the project shared coordinates
7	Low	1B06PH	ME-000002	CAD import	Imported Chem-Feed Pkg-R0.dwg	2	elements	Replace with a Revit family, or delete it
8	Low	1B06PH	ME-000002	CAD import	Imported Chlorine Transfer pump.dwg	1	element	Replace with a Revit family, or delete it
9	Low	1B06PH	ME-000002	Generic Models	Family MEC-GEN-Base-PAR, type SPAL- MECH EQ -Base	1	element	Move the family to its right category
10	Low	1B06PP	ME-000003	CAD import	Imported sewage-pump.dwg	2	elements	Replace with a Revit family, or delete it
11	Low	1B06PP	ME-000003	CAD import	Imported AIR VENT 100mm.dwg	3	elements	Replace with a Revit family, or delete it
12	Low	1B06PP	ME-000003	CAD import	Imported FAB200-25RF.iam	3	elements	Replace with a Revit family, or delete it
13	Low	1B06PP	ME-000003	CAD import	Imported O_859_00_DN500_1XXXX00_AA0.ipt	2	elements	Replace with a Revit family, or delete it
14	Low	1B06PP	ME-000003	Generic Models	Family PAR-ME-GEN-PSN_STEPS_LADDER, type Ladder	2	elements	Move the family to its right category
15	Low	1B06PP	ME-000003	Generic Models	Family PAR-ME-GEN-SPAL- MECH EQ -Base, type SPAL-MECH EQ -Base	36	elements	Move the family to its right category
16	Low	1B06WL	ME-000002	CAD import	Imported Air Vent Valve.dwg	2	elements	Replace with a Revit family, or delete it
17	Low	1B06WL	ME-000002	Generic Models	Family PAR-ME-GEN-MECH EQ Base, type SPAL- MECH EQ -Base	1	element	Move the family to its right category

C06 ME element IDs

One element per row. Filter on Model, copy the Element ID cells, then in Revit: Manage > Select by ID.

Building	Model	Check	CAD file or family	Type	Element ID
1B06PH	ME-000002	CAD import	Chem-Feed Pkg-R0.dwg		1819523
